Graco's got you covered

Facilities Worldwide for Global Support

Quality First

At Graco we pride ourselves on providing best-in-class products. Engineered solutions are manufactured in our own facilities, with the highest standards in the industry. We provide you with world-class customer support and expertise to help solve your lubrication challenges.

Global Reach

Graco has facilities across the globe to provide you with the products and service *you* need, where *you* live. Plus, Graco has dedicated field experts in all areas of the world to support the products we sell.

Product Capabilities

Graco has a broad range of products to provide solutions that meet your needs. Our products are engineered and tested to perform in the harshest environments so you can be certain your equipment is protected and working at peak performance.

Graco Lubrication Equipment Generates More Profits

Save Tech Time

Extend component life and save money by automatically lubricating when you need it most—while your turbine is working. Graco's lubrication systems allow you to focus expensive technician time on where you need it most.

Real Solutions for Real People

Field-Proven Performance Designed to Save You Money

Wind Energy

Lubrication Solutions

Keep Profits Turning

Graco offers a complete line of automatic lubrication systems that are built for the demanding conditions in a wind turbine. All wind turbines have critical bearings and drives that when lubricated properly, extend time between service calls and extend the life of vital components. Graco lube systems are on the job when your equipment is working to provide optimal lubrication every few hours with a small amount of grease.

Don't risk downtime by manually under or over lubricating your wind turbine. Choose Graco to provide round the clock protection.

Graco lubrication equipment optimizes the maintenance process to save money.

G3™ Pump
Designed to meet changing temperatures, challenging installation requirements and changing grease types head-on.

GL Series Grease Injectors
Accurate, reliable and adjustable lubrication for any lube point in your turbine.

Trabon® Divider Valves
Available in both one piece blocks and modular assemblies, they reliably and precisely lubricate and protect your equipment.

Single Series™ Lubricators
Designed for remote and hard to reach lube points, Graco's Single Series lubricators deliver predetermined lubricant directly to your lubrication point.

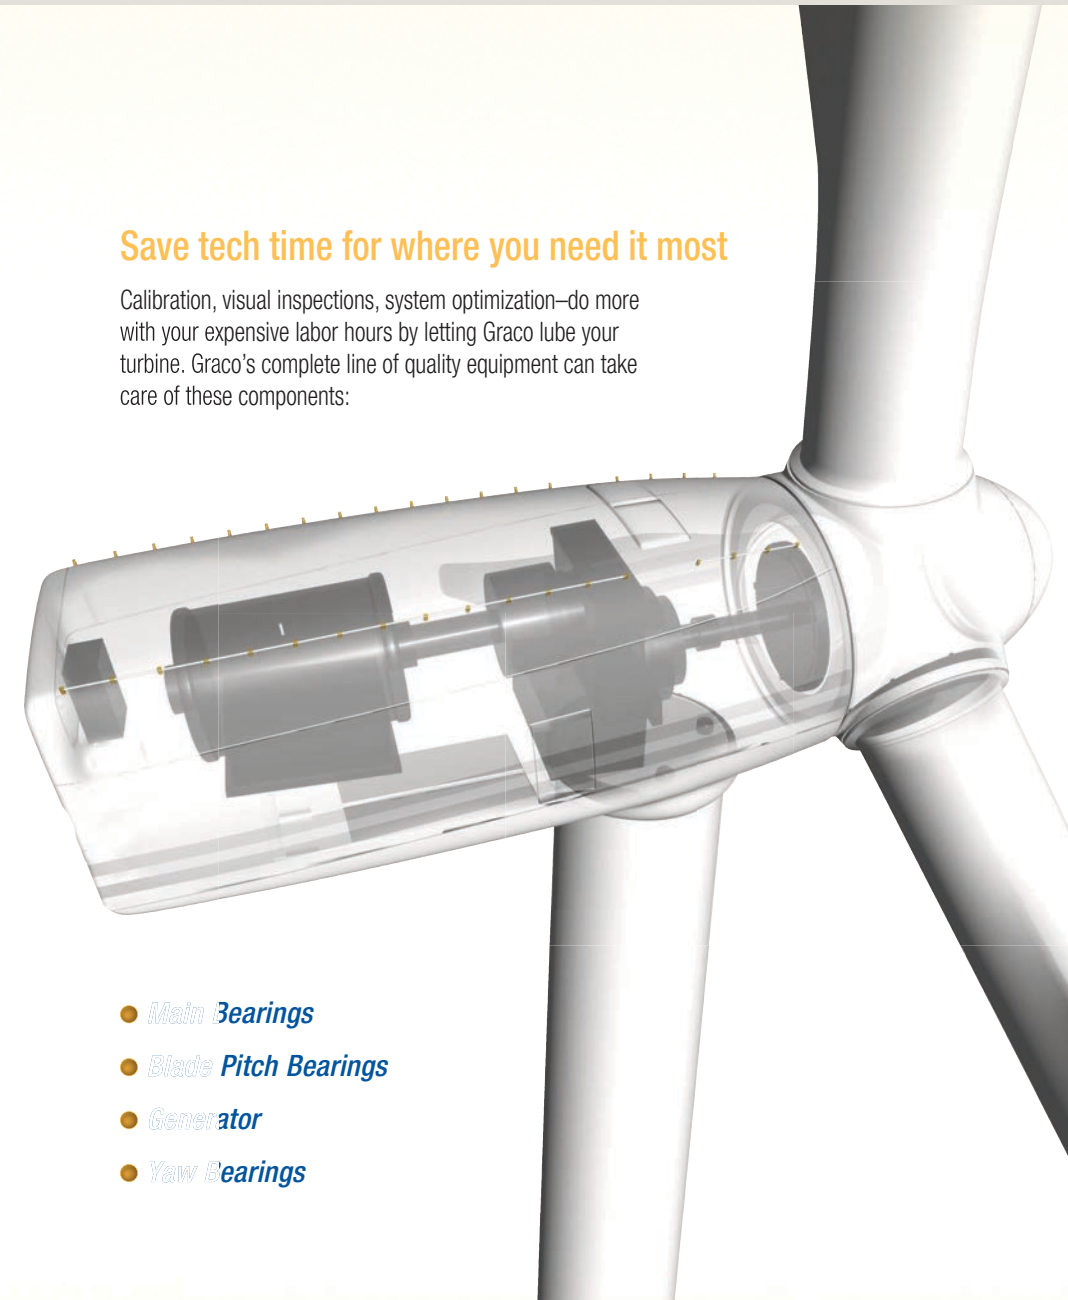

Lubrication Pinion
Consistently applies lubricant directly and precisely to the gear tooth flanks. Lubricant is supplied by the G3 pump at the interval your system requires.

Gear Spray Valves
For more control and precise application of lubricant onto the open gear teeth. Uses less lubricant, and provides a thin film for protection.

Save tech time for where you need it most

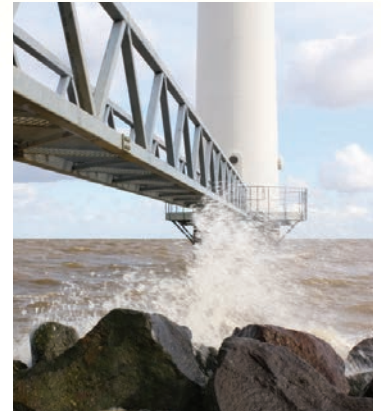

Calibration, visual inspections, system optimization—do more with your expensive labor hours by letting Graco lube your turbine. Graco's complete line of quality equipment can take care of these components:

- Main Bearings
- Blade Pitch Bearings
- Generator
- Yaw Bearings

Graco equipment keeps you grounded

Our advanced monitoring capabilities work seamlessly with wind turbine control systems to provide you the peace of mind knowing your assets are protected profit generators.

Harness extreme environments

Extremes in temperature, salt spray, dust storms and spinning mounting locations are no match for the durability delivered by Graco lubrication products. Send a powerful message to your customers by using top-quality Graco equipment and deliver top-quality results.
